***Claim Rejections - 35 USC § 112***

1. Claims 4-5 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

It is unclear and indefinite whether "an area having no color filter" (1<sup>st</sup> occurrence, line 9 of claim 4) is the same or different from "an area having no color filter" (2<sup>nd</sup> occurrence, line 10). In accordance with the specification and the drawings, it appears that these are two different areas. For examination purposes, the Examiner interpreted the 1<sup>st</sup> occurrence as "an area having no color filter" and the 2<sup>nd</sup> occurrence as --an additional area having no color filter--.

***Claim Rejections - 35 USC § 103***

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 7-11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Shirota et al (US 5948576, IDS).

Shirota discloses liquid crystal display comprising: a first electrode; a second electrode opposing the first electrode; a plurality of dots formed in areas at overlapping portions of the first electrode and the second electrode; and a plurality of color filters (e.g., 17), a color filter being arranged to correspond to each of the plurality of dots, the color filter continuously extending

beyond the area of each of the plurality of dots (see at least Figures 1-4).

Shirota discloses the display comprising individual dots of the plurality of dots being associated with different color filters which display different colors and the different color filters associated with individual dots not overlapping (see at least Figures 1-4).

Shirota discloses the display comprising the different color filters associated with individual dots contacting one another in an area extending beyond an area of a dot (see at least Figures 1-4).

Shirota discloses the display comprising the different color filters associated with individual dots being arranged so as to be separated from one another (see at least Figures 1-4).

### ***Double Patenting***

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the “right to exclude” granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re*

Art Unit: 2871

*Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

4. Claims 1-11 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 30-31 of copending Application No. 10/995176 (cited in newly-submitted IDS). Although the conflicting claims are not identical, they are not patentably distinct from each other because both comprise at least similar and overlapping subject matter such as a dot area formed at an overlapping portion of the first electrode and the second electrode, a color filter arranged in a section of the dot area, a layer arranged in another section of the dot area in which no color filter is arranged, the layer being transparent.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

***Conclusion***

5. Applicant's submission of an information disclosure statement under 37 CFR 1.97(c) with the fee set forth in 37 CFR 1.17(p) on 01/26/06 prompted the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 609.04(b). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
